

Integration with Handheld GPS Devices

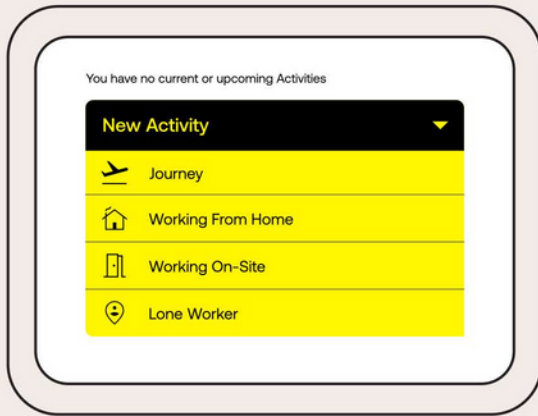

Do you lose visibility of your workers in low connectivity?

SafetyIQ and GPS Devices together, provide complete visibility of your workers no matter where they are. If a duress/SOS button is activated, or a Check-In is missed, an escalation process is triggered.

- Check-In directly with handheld GPS device
- Accurate visibility in the event of an escalation
- SOS buttons for immediate emergency response

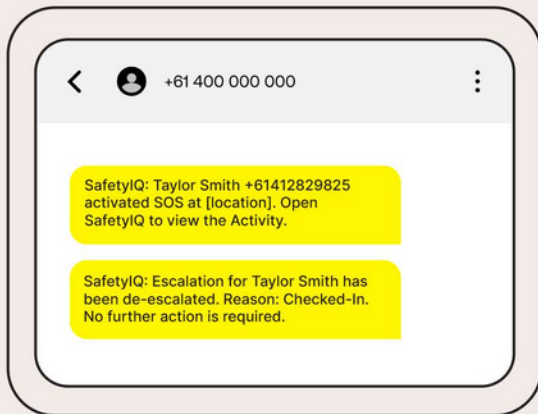

①

Self-Managed Activities

Users create a Journey and the integration seamlessly connects the device location to the Journey.

②

Monitoring Activities

If a duress/SOS button is activated or a Check-In is missed, an escalation process is triggered.

③

STATUS	USER	START TIME	START LOCATION
ACTIVE	Angela Kim	3 hours ago	Melbourne VIC
ACTIVE	Peter Sauer	2 hours ago	Townsville QLD
PENDING	Sam Claffe	15 June 24	Mine Site A
PENDING	Arna Moon	16 June 24	Melbourne VIC
PENDING	David Anderson	16 June 24	Mine Site B
PENDING	Andrew Jacob	18 June 24	Mine Site A
PENDING	Courtney Lee	19 June 24	Mine Site B
PENDING	Taylor Smith	24 June 24	Substation C

Dashboard & Analytics

Managers can search for a worker's location in the Activity Dashboard, creating a digital people movement board.

Our Integrations

SafetyIQ has built integrations with highly reputable and global GPS Device providers.
