

Lone Worker Safety Monitoring

Keep your lone workers connected with SafetyIQ.

Centralised visibility of your entire workforce

Reliable and automated escalation process

Effective communication with periodic check-ins

Proactive and customisable risk assessments

“SafetyIQ is a vital tool as we manage the risk of having solo workers travelling across multiple client sites. It also provides a clear and concise record of on-site service appointments for compliance - to assure the client we are managing the risk.”

Results

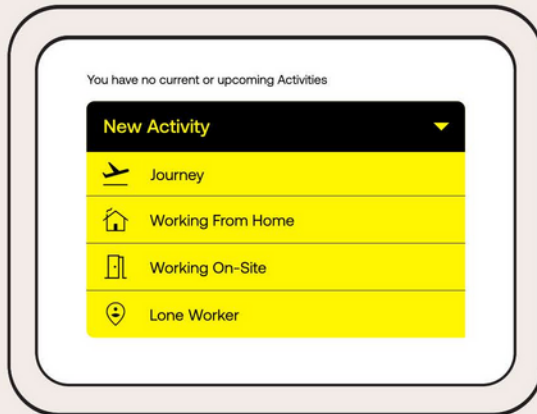

Complete visibility of workers across Sandvik's entire operations.

Per month, Sandvik save:

\$1000	42 ^{hr}

How it Works

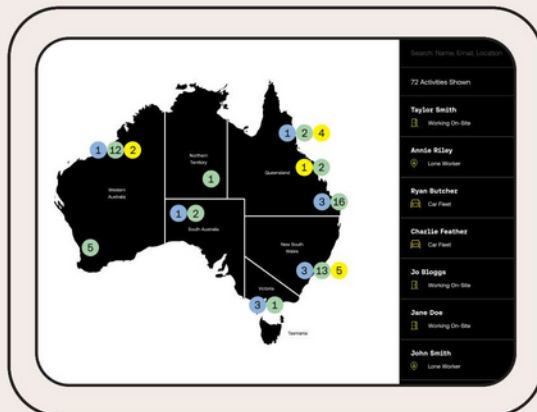

1

Self-Managed Activities

Users create a Lone Worker Activity with Check-Ins at scheduled time intervals.

2

Monitoring Activities

The user's escalation contacts are notified if they fail to check-in. Managers can use the centralised map to view all Lone Workers and review Audit logs for more details of individual activities.

3

STATUS	USER	START TIME	START LOCATION
ACTIVE	Angela Kim	3 hours ago	Melbourne VIC
ACTIVE	Peter Sauer	2 hours ago	Townsville QLD
PENDING	Sam Claffe	15 June 24	Mine Site A
PENDING	Arna Moon	16 June 24	Melbourne VIC
PENDING	David Anderson	16 June 24	Mine Site B
PENDING	Andrew Jacob	18 June 24	Mine Site A
PENDING	Courtney Lee	19 June 24	Mine Site B
PENDING	Taylor Smith	24 June 24	Substation C

Dashboard & Analytics

Managers can search for Users that are currently working alone using the Activity Dashboard like a digital people movement board.
